About Us

Since our inception in early 2009, Light & Form Design is quickly becoming known and respected for adhering to our key core philosophy: Provide high quality, aesthetic, forward-thinking design solutions with a client-driven experience and team member-like focus. It's a simple ideal, but it's our view that your project is often a culmination of much hard work, goals set and achieved, and part of your bigger overall vision...so your project should be treated with the same level of importance by your Architect. We keep our company manageable in size to assure we can keep the highest level of client service, while never allowing your project to become part of a 'pipeline'. We are a multi-state, award-winning Architectural firm that specializes largely in multifamily housing and design. Our career portfolio ranges from student housing to tax credit/affordable housing, market rate housing to mixed use development, and site development to project feasibility studies.

About Us

Since our inception in early 2009, Light & Form Design has built a solid reputation by adhering to our core philosophy:

Provide aesthetically pleasing, forward-thinking design solutions in a client-driven environment from a team-member perspective.

It's a simple ideal. Your project is the culmination of substantial hard work, goals set and achieved. As an integral part of your overall vision, it deserves the same high level of respect from your architect. Your project won't become part of a "pipeline." We keep our project list manageable to ensure the highest level of client service.

Light & Form Design is a multi-state, award-winning architectural firm specializing in multifamily housing and design. Our career portfolio range includes:

- Student housing
- Tax credit/affordable housing
- Market rate housing
- Mixed use development
- Site development
- Project feasibility studies
